

OMNI HOLDER®
FOR SURGERY & ICU

With two positions for pressure transducers.

The OmniHolder DUO

The OmniHolder DUO is the solution to eliminate clutter, material waste, decrease potential medical errors and infection transmission during patient care during surgery and ICU management.

A single platform to hold and secure safety-sensitive medical accessories improves set-up time by being readily available and preassembled, eliminating the need to gather multiple pieces when time is of the essence.

The OmniHolder DUO allows the invasive pressure transducers always to be calibrated at heart level, secures the breathing circuit, prevents manifolds central lines entanglement and pulling, and TEE probe dislodgements from the patient when the operating table moves.

Who can benefit

Hospitals

Physicians

Nurses

Insurance

Patients

Easy to fold and store

Removable TEE handle ring holder

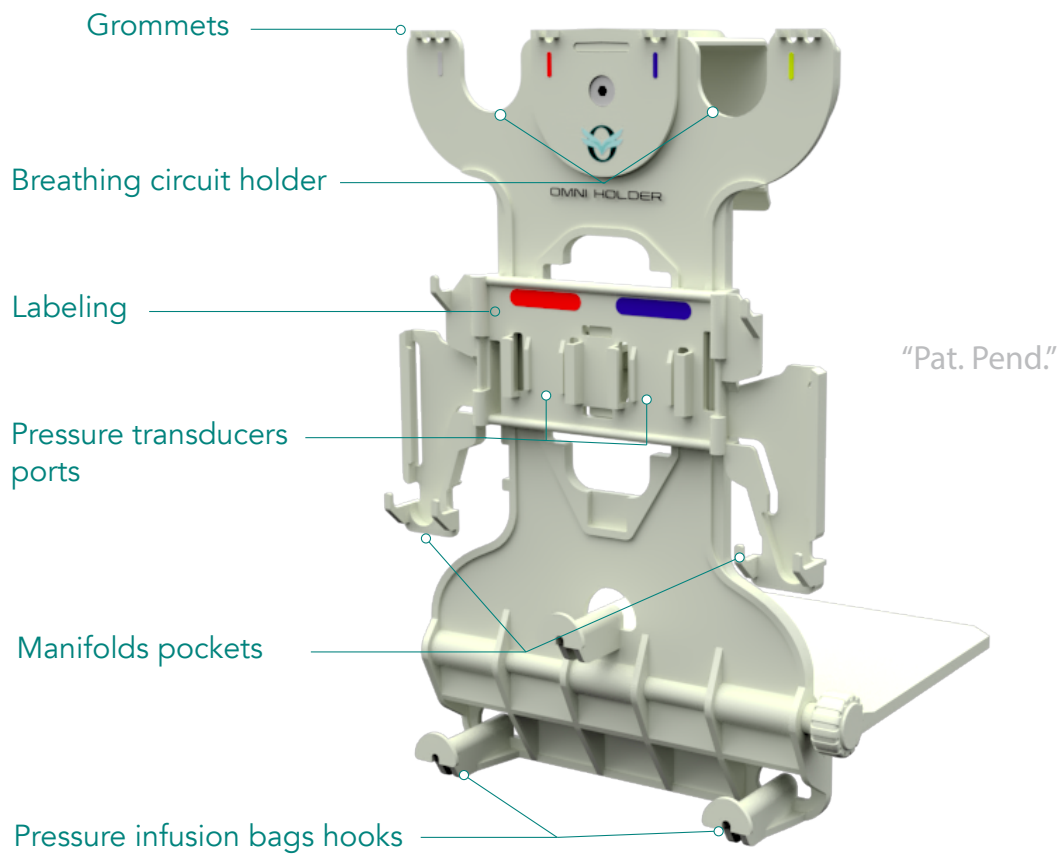

Self-adjusting rotational hook

Height adjusting mechanism
